

CREATE THE WORKFORCE OF THE FUTURE

We are looking for industry partners who can support our Digital Production, Design and Development T Level students with a placement.

As one of our industry partners you will be key to the development and shaping of the digital software developers of the future, who can progress by moving into a skilled occupation or further study, such as higher or degree apprenticeship, higher level technical study and university.

Your placement student will spend 80% of their time in college and 20% on placement in your business (equivalent to 45 days) where they

will gain the knowledge and skills both your business and future employers are looking for and develop a better understanding of the workplace.

At college, students studying the Digital Production, Design and Development T Level will learn about the business context and environment, change management, concepts and fundamentals of data, digital analysis and environments, diversity and inclusion, emerging technologies, security and legislation, project planning, development and testing of IT systems and use of collaborative technologies.

Can you offer a placement?
