Walsall College

Functional Skills Maths & English

Supporting you to develop the skills of your workforce is what we do

- Help develop English reading, writing, speaking and listening skills, resulting in improved communication.
- Develop basic Maths skills such as number, data handling, measure, shape and space, contributing to improved productivity levels and better quality control.

We offer fully funded* functional skills English and Maths qualifications at times that suit you and your staff so that learning fits around their work and home life. We are able to create bespoke groups or your staff can join one of the classes we already have in place.

We offer a flexible delivery model, from one day a week for 10 weeks or for a couple of hours a week, through to bespoke packages.

We have classes running five days a week and currently deliver 100% virtually, to ensure your staff can learn safely, at a pace that suits them. We can arrange for exams to be taken in the workplace so are able to support your staff wherever they work within England.

Our aim is to develop English and maths skills that support people in their current and future jobs roles and help them progress in their training and career.

An initial assessment will be carried out followed by a 1-1 discussion with one of our English and maths experts to find the right course for your employees.

*Subject to eligibility criteria being met.
